HOLISTIC DAIRY NUTRITION

UNO-YEAST

Dairy Farming is becoming un-economical due to increasing input cost. Also, the feed for high milking breeds requires innovative technology to match their potential. Uno-Yeast is Ruminant specific **double strain** yeast to improve and sustain favourable ruminal microbial population and ruminal health.

Uno-Yeast is a unique double strain yeast culture containing two time tested yeasts.

Saccharomyces cerevisiae and Aspergillus oryzae.

Uno-Yeast is rich nutrient source for fibre-degrading cellulolytic bacteria. Uno-Yeast helps improve feed digestibility and make nutrients more available to the animal for growth, production and fertility.

BENEFITS

- Stabilises rumen pH.
- Improves rumen development and rumen environment.
- Improves fibre digestion and thus, more nutrient availability.
- Increased milk production & milk quality.
- Prevents acidosis and rumen atonia.

ADMINISTRATION: 1-2 Kg / MT of Feed

PRESENTATION: 5 Kg Polylaminated Paper Bag
