HOLISTIC DAIRY NUTRITION

ToxiGo-H

Crop residues and feed stuffs are potent source of aflatoxin. When animals fed these materials they excrete aflatoxin metabolites in milk which are hazardous for consumers.

Aflatoxins reduce immunity in animals. The productivity is reduced and reproductive capabilities of animals drastically affected.

ToxiGo-H is specially treated and assorted Hydrated Sodium Calcium Aluminosilicate, with a specific pore size, added with Oxinate Copper.

ToxiGo-H binds the toxins available in feed and prohibits its absorption in intestine.

The toxins are excreted in dung without being absorbed and any damage to animal.

BENEFITS

- Binds the toxins efficiently in digestive tract
- Maintains proper immunity and productivity of animals
- Maintains good health of animals
- Stops entry of toxins in human food chain

ADMINISTRATION: 1-2 Kg / MT of Feed

PRESENTATION: 25 Kg Polylaminated Paper Bag
