HOLISTIC DAIRY NUTRITION

## BUF-ON

Modern dairying has become more sophisticated with increased number of high milking animals and high density feeding. Such animals are prone to rumen-acidosis more frequently.

BUF-ON has been formulated with optimum combination of buffering compounds: sodium bi-carbonate and magnesium oxide to use their efficacy at the best.

### BENEFITS

- Maintains optimum pH of the rumen and prevents rumen acidosis.
- Enhances nutrient utilization and milk production
- Improves milk constituents
- Prevents conditions like lameness & diarrhoea due to acidosis

### ADMINISTRATION

3-7 Kg / MT of Feed

### PRESENTATION

25 Kg Polylaminated Paper Bag
