

**Duraferm is Ruminant specific double strain yeast to improve and sustain favourable ruminal microbial population and ruminal health.**

Duraferm is a unique double strain yeast culture containing two time tested yeasts.

***Saccharomyces cerevisiae and Aspergillus oryzae.***

Duraferm is rich nutrient source for fibre-degrading cellulolytic bacteria. Duraferm helps improve feed digestibility and make nutrients more available to the animal for growth, production and fertility.

**BENEFITS**

- Improves digestion
- Stabilises rumen pH.
- Improves rumen development and rumen environment.
- Improves fibre degradation.
- Increases milk production, milk fat & SNF.
- Prevents acidosis and rumen atonia.

**DOSAGE**

Dairy Cow and Camel : 10-20g / Animal / Day

Heifers, Goat and Sheep : 10g / Animal / Day

Breeder Bulls : 20g / Animal / Day

Feed : 1-2Kg / MT

or as directed by Veterinarian / Nutritionist

**PRESENTATION**

10 x 10g Box

**DURAFERM**
